15. In this question we are trying to get information about the duration of the LSA programs and activities in your school/district and the amount of time students are engaged in preparation, reflection, and service. Please fill in the table below with the numbers of program participants and **average hours** of preparation and service.

Instructions for completing table on service hours

1. First, estimate the number of service-learning participants who were in service-learning programs of the durations listed in the table below from July 1, 2005 to June 30, 2006. If you have more than one activity or program, please combine them in reporting participant numbers and hours. The total number of participants for all durations should equal the total number of participants reported in question 9.

2. Next, for each of the project durations, calculate the average hours of preparation for the service and formal reflection per participant during or after the service and enter that figure in column 3. 3. Finally, enter the average number of hours of service for a participant. Enter that figure in column 4.

- Preparation activities might include conducting background research, collecting data, attending trainings, assembling materials, rehearsing parts, and meeting to plan project activities during and after class.
- Formal reflection activities might include classroom discussions, keeping a journal, writing an essay or a poem, and making a class presentation.
- Service might include a variety of activities, including the following: providing direct service to individuals (tutoring, assisting at a human services agency, working in a classroom, etc.); service projects addressing a community need (for example, cleaning a park, raising money for a local program, monitoring local water quality), or education and advocacy efforts such as presenting a play on a community issue, organizing or testifying at a public hearing, or preparing educational materials (brochures, posters, etc.) on a local issue.

Example 1. The "Plant a Tree Project" lasted 2 months and involved 60 students (see 'a' in the table below). The average student in this project spent 8 hours engaged in preparation for the service and in formal reflection activities during and after the service (see 'b'). The service activity itself took approximately 2 hours per student (see 'c').

Example 2: The senior Civics Class is organized around a core service-learning program. It meets one hour, two days a week for one semester, and has 25 students (see 'd'). Each student in this class spent 63 hours engaged in service-learning preparation for the service and formal reflection during and after the service (see 'e'). The service activity itself was 10 hours (see 'f'). (Calculation: 2 hours of class + 1 hour of preparation + .5 hours of formal reflection x 18 weeks = 63 hours per student; 10 hours of service per

student).
